Program Overview

The Bachelor of Arts in Ministry Technology and Digital Media prepares students to lead technology and media for ministries and organizations. Students study artificial intelligence and its ethics, video and audio production, social media, web and platform design, podcasting, AI for research and teaching, and data security.

How EACU Is Different

Technology, including artificial intelligence, is examined from every side: its possibilities, its limits, and its ethical risks. Students learn to use AI and digital media with discernment, truthfulness, and integrity, and to make technology serve the mission rather than replace it.

Every EACU degree walks students through the evidence from every side and asks them to reach, write, and defend their own conclusions, while remaining grounded in the foundation of truth. Students learn to distinguish what the biblical text states, what ancient and later traditions add, and what interpreters have concluded.

> **Required in every EACU degree:** Biblical Interpretation (Rightly Dividing the Word), Biblical Finance and Stewardship, and Biblical Mindset and Mental Health. Every course is built with visual, auditory, reading and writing, and hands-on learning.

Program Outcomes

1. Use AI and digital tools effectively in ministry.
2. Evaluate technology ethically.
3. Produce video, audio, and social media content.
4. Design websites and online platforms.
5. Protect data and privacy.
